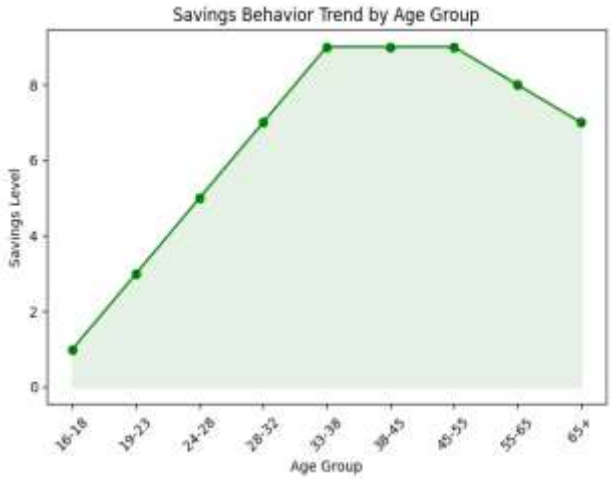
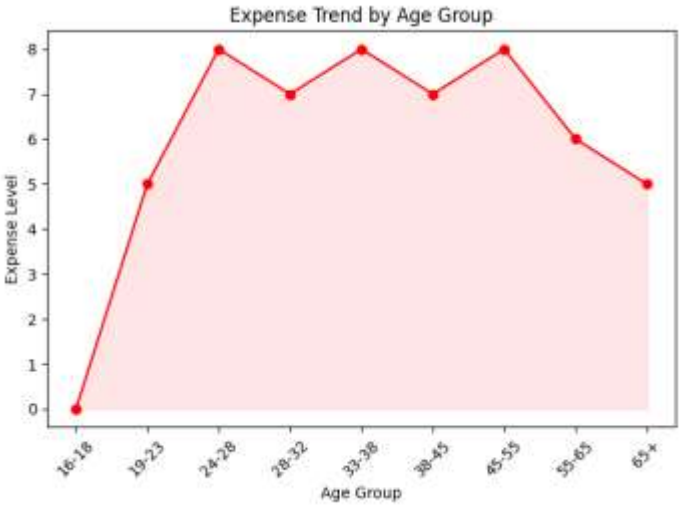
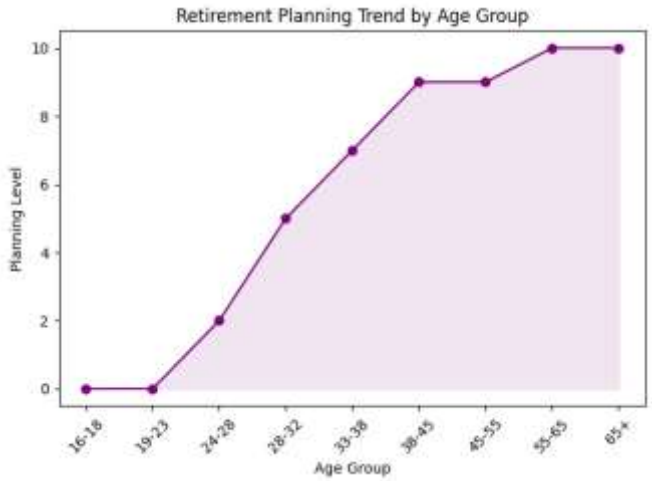
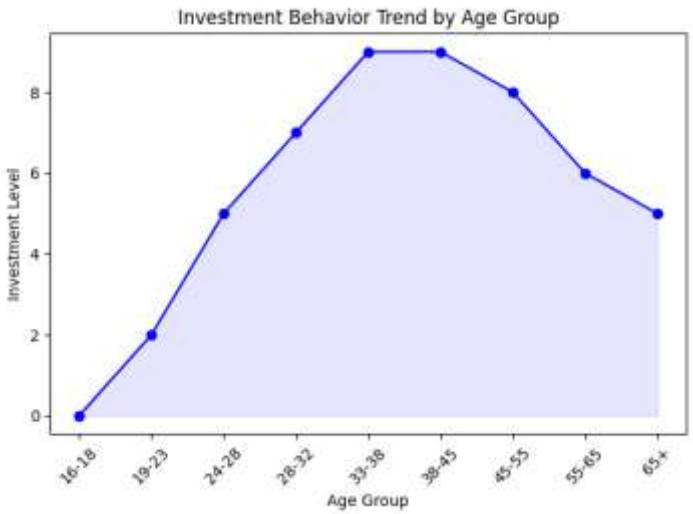
38–45	Stable / Very stable	60–78%	Very structured & consistent	Mature portfolios (real estate, gold, MFs)	Advanced	Strong & ongoing	Education, Healthcare, Lifestyle
45–55	Stable / High income	60–85%	Highly disciplined	Diversified but slightly conservative shift	Advanced	Strong (10–25%)	Children's education, Healthcare, Loans
55–65	Stable / Pre-retirement	30–65%	Conservative & consistent	Shift to low-risk (FDs, gold, limited equity)	Intermediate - Advanced	Very active & near execution	Healthcare, Insurance, Basic living
65+	Pension / Passive / Dependent	20–55%	Conservative	Very low-risk (FDs, gold, real estate)	Beginner - Intermediate	Implemented (passive income)	Healthcare, Family support







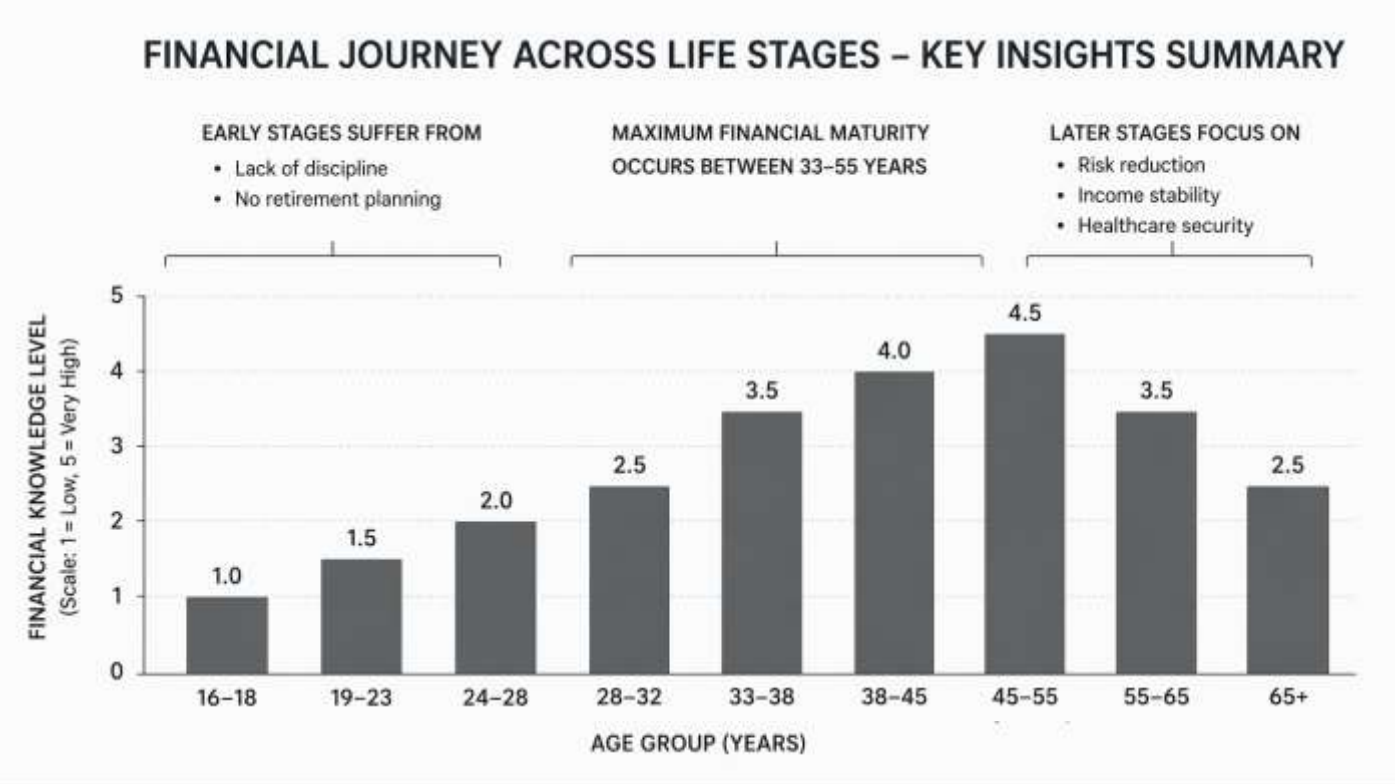


Age-wise Financial Behaviour Analysis

Age Group	Key Insight Result
16–18	Individuals have no financial exposure, with habits still in the formation stage and complete dependence on family.
19–23	This is an exploration phase, where awareness begins but lacks discipline, leading to inconsistent saving and financial instability.
24–28	Although income starts increasing, savings leak due to lifestyle inflation, resulting in weak financial structuring.
28–32	A turning point stage, where individuals either begin wealth creation or fall into debt accumulation patterns.
33–38	Individuals face peak responsibility, showing structured financial behavior and active wealth creation strategies.
38–45	Focus shifts toward optimization and risk management, with mature investment decisions and strong financial planning.
45–55	This is the peak earning phase, but also the period of maximum financial pressure due to loans and dependents.
55–65	A transition phase, where focus shifts from growth to capital protection and retirement readiness.
65+	A survival and stability stage, prioritizing income security and healthcare, with minimal risk-taking.

Result:

- Financial knowledge progressively improves with age
- Maximum financial maturity occurs between 33–55 years
- Early stages suffer from:
  - Lack of discipline
  - No retirement planning
- Later stages focus on:
  - Risk reduction
  - Income stability
  - Healthcare security



FINANCIAL JOURNEY ACROSS LIFE STAGES – KEY INSIGHTS SUMMARY
EARLY STAGES SUFFER FROM
• Lack of discipline
• No retirement planning
MAXIMUM FINANCIAL MATURITY OCCURS BETWEEN 33–55 YEARS
LATER STAGES FOCUS ON
• Risk reduction
• Income stability
• Healthcare security
